VISION

The Environment and Energy usage Policy of Tula's Institute Dehradun is to manage energy in such a systematic way so as to minimize its impact on the environment. The policy implies to explore the renewable energy resources (availability as per geographic location) to reduce the burden of the government and to find out alternate resources as solutions to the energy crisis.

This environment and energy policy is binding for all the components of the institution and applies to all its stakeholders and to the various activities undertaken by the institution. It will help us to embed efficiency and environmental awareness into our everyday activities, thus helping us to realize our responsibilities and commitment to conservation of natural resources and to limit its usage. Energy & Environment audit Committee should be formed and devoted to the cause of environmental awareness, to undertake green initiatives, and to conduct green literacy programmes to save energy and to protect the environment.

AIMS AND OBJECTIVES

- To assess our energy usage and measure its impact on the environment.
- To motivate and minimise CO2 emissions generated by our means of transportation -Encouragement for pool transportation in vehicles.
- To reduce air pollution emissions using environment-friendly vehicles, including bicycles, and use of pedestrian-friendly roads.
- To install photovoltaic solar panels for the generation of alternate energy.
- To install LED bulbs (in new constructions & as replacement of old lighting systems) in the whole campus to save energy.
- To develop systematic waste management mechanism like biogas plant for the biodegradable wastes
- To develop rain water harvesting unit.
- To undertake tree plantation drive.
- To take additional measures to continuously improve our energy consumption by creating awareness about the conservation of energy.

Director
Tula's Institute, Dehradun

Director
Tula's Institute, Dehradun

- To ensure the availability of necessary resources to achieve our objectives.
- To encourage use of advanced technology to minimize energy consumption like sensor based lighting systems
- To engage in dialogue with the government agencies, municipal corporation and the affiliating university and actively work with the local organizations in the areas of environment ,energy efficiency and sustainable development.
- To monitor and respond to emerging environmental and energy issues. To strengthen our employees' and students' environmental knowledge and skills in order to improve our own environmental performance.
- To provide information and training opportunities on energy saving measures.
- To offer opportunities for employees and students to engage in initiatives which contribute to environmental protection.

COMMUNICATION

This policy will be communicated to the students and employees via internal communication channels through notice boards, hoardings and will be made available to all the stakeholders. The Environment and Energy Policy, objectives and targets will be reviewed on a regular basis by the Energy & Environment Committee Convener and its members under the guidance of the Head of the institution.
