## *Life Skills Training Program for first year Engineering & other Graduates*

We find that behavior does not always follow the mind. This is when incidents of "I know but I can't help it" occur. What we need is the ability to act responsibly. Life skills enable us to translate knowledge, attitudes and values into actual abilities.

Life skills training is an efficacious tool for empowering the youth to act responsibly, take initiative and take control. It is based on the assumption that when young people are able to rise above emotional impasses arising from daily conflicts, entangled relationships and peer pressure, they are less likely to resort to anti-social or high risk behaviors.

## **3 WEEKS INDUCTION PROGRAM AT TULA'S INSTITUTE**

### **Introduction**

Tula's Institute has conducted 3 weeks Induction Programme for first year students from 4<sup>th</sup> October 2021 to 24<sup>th</sup> October 2021 in Institute premises.

Mentoring is a particular form of relationship designed to provide personal and professional support to an individual. The mentor is generally more experienced than the mentee and makes use of that experience in a facilitative way to support the development of the mentee. The mentoring relationship provides a developmental opportunity for both parties and can thus be of mutual benefit. In a nutshell, a student mentor's role may be perceived to be facilitative, supportive and developmental for the student community in general and the first-year students in particular.
